Composition Statement

Aloe macroclada dry powder - Alomac®

This letter is to inform the reader that Alomac® nominally contains the following ingredients:

- Aloe macroclada dry powder of inner leaf gel – 99.5%
- Citric acid (food grade, as preservative) – 0.5%

Note: Citric acid is added before the first blending of the gel and gel fillets. Final Lot testing often shows non-detect for citric acid. Some methods (such as the NMR product ID method, which includes an acid/base treatment) detects amounts of citric much lower than expected. Some of the citric acid evaporates (can be smelled) during the drying process and we believe some probably binds to bases in the gel during the drying process.

Evidence supports percentage of Aloe macroclada in Alomac® is 99.8 to 99.9%.
