

Mr. John James
JWJames Consulting
1144 Lockland Ave.
Winston Salem, North Carolina 27103

December 30, 2022

Dear Mr. James:

This letter is to inform you that the notification that you submitted pursuant to 21 United States Code (U.S.C.) § 350b(a)(2) (section 413(a)(2) of the Federal Food, Drug, and Cosmetic Act (the Act)), was received and filed by the Food and Drug Administration (FDA or we) on October 19, 2022. Additional information was received on November 10, 29, December 22 and 28, 2022. Your notification concerns the new dietary ingredient “Alomac - powdered *Aloe macroclada* gel” that you intend to market as a bulk dietary ingredient.

According to your amended notification, the conditions of use are “to take with at least 400mL water.” The maximum daily serving is “300 mg” of Alomac. The conditions of use also state that Alomac is “[n]ot recommended for children or pets.”

Under 21 U.S.C. § 350b(a), the manufacturer or distributor of a dietary supplement containing a new dietary ingredient that has not been present in the food supply as an article used for food in a form in which the food has not been chemically altered must submit to FDA, at least 75 days before the dietary ingredient is introduced or delivered for introduction into interstate commerce, information that is the basis on which the manufacturer or distributor has concluded that a dietary supplement containing such new dietary ingredient will reasonably be expected to be safe. FDA reviews this information to determine whether it provides an adequate basis for such a conclusion. Under 21 U.S.C. § 350b(a)(2), there must be a history of use or other evidence of safety establishing that the new dietary ingredient, when used under the condition recommended or suggested in the labeling of the dietary supplement, will reasonably be expected to be safe. If this requirement is not met, the dietary supplement is considered to be adulterated under 21 U.S.C. § 342(f)(1)(B) because there is inadequate information to provide reasonable assurance that the new dietary ingredient does not present a significant or unreasonable risk of illness or injury.

In accordance with 21 CFR 190.6 (c), FDA must acknowledge its receipt of a notification for a new dietary ingredient. For 75 days after the filing date, you must not introduce or deliver for introduction into interstate commerce any dietary supplement that contains the new dietary ingredient that is the subject of this notification. Please note that acceptance of this notification for filing is a procedural matter, and thus, does not constitute a finding by FDA that the new dietary ingredient or supplement that contains the new dietary ingredient is safe or is not adulterated under 21 U.S.C. § 342. FDA is not precluded from taking action in the future against any dietary supplement containing your new dietary ingredient if it is found to be unsafe, adulterated, or misbranded.

Your notification will be kept confidential for 90 days after the filing date of October 19, 2022. After the 90-day date, the notification will be placed on public display at www.regulations.gov as new dietary ingredient notification report number 1263. Prior to that date, you may wish to identify in writing specifically what information you believe is trade secret or confidential commercial information and include an explanation of the basis for this belief.

If you have any questions concerning this matter please contact Ms. Markeesa Scales, MPH, Division of Research and Evaluation by email: NDITEAM@fda.hhs.gov.

Sincerely,

Philip Yeager -S
