

## Aloe *Macroclada* Gel Powder

Clinically Proven to Increase Circulating Adult Stem Cells  
Highest Percent Polysaccharides of All Aloes  
Ready Supply in Bulk for Nutritional Products

Multiple human clinical trials have demonstrated that Aloe *macroclada* increases the number of circulating adult stem cells better than any known natural product, and is completely safe

\*

Alomac averages over 25% polysaccharides! This may explain all of the health uses in Madagascar: rejuvenating health, healing quickly, improving eyesight, improving skin, and more

\*

Unique to Madagascar where it is known as *vahona*, Aloe *macroclada* is grown and produced in Madagascar by Mioty Voajanahary

\*

100% Aloe *macroclada* gel (dried and milled) – Alomac®

\*

Include Alomac in your nutritional supplement instead of Aloe vera

\*

Currently in capsule and drink products in the U.S. and Europe

### Stem Cells

A key player in our body's ability to heal itself comes from our own stem cells, known as adult stem cells. Originating in bone marrow, adult stem cells enter the bloodstream when attracted by chemical signals coming from dead and dying cells. They migrate to the cells and have the ability to develop into functional cells to replace the old. As we get older we have fewer circulating adult stem cells.

Alomac® mobilizes adult stem cells, which increases the number circulating in the blood.

Mioty Voajanahary was founded and is managed by an American with 25+ years in pharmaceutical R&D. All aspects of production follow Good Manufacturing Practices.
