

Why buy Alomac?

Highest Percent Polysaccharides of All Aloes - Alomac consistently averages over 25% total polysaccharides. This is 10% higher than other aloes.

Multiple human clinical trials have demonstrated that *Aloe macroclada* increases the number of circulating adult stem cells better than any known natural product, and is completely safe.

Alomac is a gel powder, ready-to-use in supplements, health and beauty, and animal care products anywhere in the world.

Adding a unique Made in Madagascar ingredient can set you apart from the aloe competition.

Join us in helping reforest Madagascar, in promoting education and in water management.

Unique to Madagascar where it is known as *vahona*, *Aloe macroclada* is grown and produced in Madagascar by Mioty Voajanahary. Alomac is 100% *Aloe macroclada* gel (dried and milled).
